

WARP PREPARATION

OPTOGUARD

Yarn stop motion OPTOGUARD

Your benefit

IP64 classified sensor, protected against dust and smallest particles.

Optical contact free end break detection, with status display via LED.

Fast and easy threading due to open design. Quick repair of broken ends.
High efficiency thanks to fast set change.

- 1 Stop state or yarn break
- 2 Run state

Product features

- Gentle yarn treatment due to low yarn tension level and reduced yarn friction
- Integrated optical yarn sensor for end break detection
- Fast detection of end breaks due to short distance between package and detection system
- Integrated blow-off device on each unit to remove dust

Technical facts

Application	Spun Yarns
Yarn count	dtex 50 dtex to 1,700 dtex
Unwinding speed	Up to 1,200 m/min
